

**555-24/B ISO CAM-BOX KIT FOR BIG-SIZE PUMP INJECTOR SYSTEMS
NAUTICAL, RAIL APPLICATIONS AND FACTORY ENGINES (Caterpillar mechanic
and electronic series 3.500 , Detroit Diesel Inijector N. 5236991)**

“Big size” pump injector kit is designed to test the efficiency of pump-injector unit.

The test is performed by mounting the injector pump on test bench through the cam-box and it tests fuel supply based on the injection time set by the 555 simulator (the mechanically controlled injection is based on threaded rod lift).

This test allows to verify pump, nozzle and solenoid efficiency.
