

CAMERA KIT WITH LCD MONITOR AND PROBE ENDOSCOPIC Ø5,50 mm

P.N.: LNT03

Kit comprises:

- ◆ Device with rechargeable LCD display ;
- ◆ Charger;
- ◆ 1 metre exploring probe (Ø5,50 mm);
- ◆ Micro Sd 1GB;
- ◆ Adaptor from Micro Sd to Sd;
- ◆ 30°/45°/60° angle lenses;
- ◆ English instruction manual

Description:

The extended probe is able to reach the most hidden and deepest corners so to get images visualised on LCD monitor. Firstly, the image is acquired and later saved as photo or video in a Micro Sd 1 GB (supplied with the kit) where it can be zoom viewed from 1x to 4x. The device may penetrate into the most remote places as it is supplied either with a LED lighting or 30°/45°/60° angle lenses (supplied with the kit).

The kit include a USB for computer connection and a charger.
