

AIR MASS-METER TESTER P.N.: TEST-DEB

With "TEST-DEB" the efficiency of Bosch hot film (A, B type) air mass-meter can be easily measured (and backtested) this is achieved through an air flow adjusted by a flow meter imposed over the reading lamella.

The lamella response is equivalent to an electrical signal and it is represented as a number on the tester display so as to be compared to the values of the reference table attached on the chassis. In case of mis-functioning, the air mass-meter can be repaired following the instructions contained in the tester user manual.

AIR MASS-METER TESTER P.N.: TEST-DEB

DESCRIZIONE

1. SIGNAL DISPLAY
2. NTC PUSH BUTTON
3. POWER PUSH BUTTON
4. CONNECTOR
5. FLOW METER
6. FLOW REGULATOR
7. AIR IN-LET
8. FEEDER CABLE
9. DISPLAY FUSE
10. FEEDING FUSE
11. AIR-MASS METER SUPPORT
12. AIR FLOW OUTLET
