

RAIL KIT

COD.: **555-30-N**

555-30-N, Test bench Rail Kit is ideally suited to check COMMON RAIL pump efficiency (fuel delivery and leakage), as well as pressure sensor, DRV1 and DRV2 type pressure regulator, and injectors without the necessity to disassemble the original rail, and so as to reduce test bench space problems.

- 1) Tester ;
- 2) DRV1 pressure regulator connection (DRV2 regulator can be applied by unscrewing the DRV1)
- 3) DRV2 pressure regulator connection (a DRV2 double regulator is available);
- 1) Vehicle pressure sensor connection;
- 2) Pump high pressure outlet;
- 3) Injectors outlet;
- 4) DRV1 exhaust;
- 5) DRV2 exhaust;
- 6) DRV2 double exhaust.

Note: With 555-30-N Rail Kit it is recommended to use the 6x2x400 12-14 cable (P.N..555-54) or the 14-14 cable (P.N.555-55).

Special accessory for 555-30-N Rail Kit :

CD30001-S: 8 quick connection Kit .
