COMMON-RAIL INJECTOR TEST BENCH

BOSCH

DENSO

DELPHI

SIEMENS

Continental

VDO

Technical data:

1. High pressure 0-1800bar;
 2. Check the injector starting pressure;
 3. Assessment of the injector spray fog quality;
 4. Inspection of the injector spray oil range;
 5. Check of the injector seal and angel;
 6. Check of the injector oil flow;
 7. The machine has fog dissipation convulsion device to improve the work condition;
 8. It has the two grade filter to ensure the cleanliness of test;
 9. The parameter of common rail injector (fuel spray counts, frequency, pulse width, pressure etc..) can be set willfully.
- Main Voltage(Vac) 220V
 - Main Frequency(Hz) 50/60
 - Max Filling Volume per Tank(lit./gal) 2
 - Input System pressure(bar/psi) 0-10/0-145
 - System Build-up Pressure(bar/psi) 1-1800bar/0-26100 psi

RECOMMENDED ITEMS :

CD39020775

Test liquid
